

Cosmological constant theory without the shadow

[M. E. Ashour](#), [M. N. Ashour](#)

Abstract

In this paper we discuss the cosmological constant theory without the shadow and show that the cosmological constant theory is the same as the (real) one. We also discuss the cosmological constant theory without the shadow and show that the cosmological constant theory is the same as the (real) one. We also discuss the cosmological constant theory without the shadow and show that the cosmological constant theory is the same as the (real) one.
